Vec: telehealth

Remote consultations (HC-TELE-04)

Issuer: Poliklinika Karpatia s. r. o. · IČO 35 678 901 · Račianska 71, 831 02 Bratislava

Use only the encrypted video platform approved by the clinic; consumer video calls and messaging apps are not permitted for clinical contact.

Confirm the patient's identity, current location and an emergency contact at the start of every session, because the nearest emergency service depends on where the patient actually is.

A remote consultation is reported to the health insurer only where the insurer's rules recognise the code; otherwise it is a private service and the price list applies.

An electronic prescription is issued through the national eHealth system; controlled substances on the special record are not prescribed remotely on a first contact.

Record the modality, the clinical reasoning and any technical limitation in the medical record, and convert to an in-person visit when examination is needed.

S úctou,

MUDr. Peter Kováč

hlavný lekár
